

ngceCodes

Our ngceCodes program offers the simplicity of delivering gift cards to your recipients via email. That means they won't have to wait for the mail to arrive to start enjoying the rewards they've worked so hard to earn. eCodes, or digital gift cards, are as easy to use as traditional gift cards, whether the recipient redeems the code online or at a physical establishment.

- **Customization** – Your eCode communications can be personalized with your brand, logo, theme and message.
- **Eco-Friendly Option** – eCodes eliminate the need for plastic gift cards, printed envelopes and letters, and postage.
- **Flexibility** – You can choose to purchase eCodes in bulk and send them out yourself or have us email them directly to your recipients.
- **Variety** – Select from an extensive inventory of major retail, restaurant and specialty gift cards available for electronic delivery.

ngceCodes are a smart choice

Our gift card API can deliver real-time eCodes to your program recipients.
